## CAREER OBJECTIVE

I'm a junior developer graduated of computer science with experience working across the full-stack of software development. I have built 20+ personal projects on different technologies and I'm planning to work on a lot more continuously developing my skills and learning new things. I'm a positive person full of energy and fun, who never gets tired.

## WORK EXPERIENCE

### Programmer (.Net developer)

**Softbinator Technologies**

August 2020 - current          📍 Bucharest, RO

- Developed both front-end (React.js) and back-end (.Net) features for different projects.

- Operated in an Agile environment in an efficient manner to achieve 100% of project goals within or before stated deadlines.

- Collaborated with 7 senior team members to learn techniques for writing practical code.

- Attended daily stand-up meetings to receive tasks and instruction for weekly goals

## PROJECTS

- Built responsive web app using React and Node

- Utilized various API's

- Developed 20+ various projects using different programming languages

- You can find out more about my projects on my github.
